**DETAILED ACTION**

***Response to Amendment***

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Specifically, the examiner accepts applicants' argument that in fact polyethylene naphthalate cords meeting the claimed low twist requirement must also have a sufficiently large denier per filament to also inherently possess the claimed compressive modulus.

***Allowable Subject Matter***

2. Claims 1-3, 5-5, 6, 9-11, 13-22, and 29-31 are allowed.
3. Due to the allowability of a generic claim, non-elected species claims 7, 8, and 12 are hereby REJOINED.
4. Due to the allowability of an intermediate product claim, non-elected final product claims 23 and 24 and method claims 25-28 are hereby REJOINED.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:  

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
6. Claims 7, 8, and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7 and 8 now contradict claim 1 (different ply orientation angle) and claim 12 now contradicts claim 11 ("said stitches" recited when claim 11 no longer recites stitches).

7. Claims 23-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit 1733

The improper form of these dependent claims (see objection below) also results in various antecedent basis problems.

*Claim Objections*

8. Claims 23-28 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. These claims are directed to other inventions rather than further limitations of the article.
